"Levi Yitzhak's Car Price List" app

Reported By: Lora Rosenstein

Verified By: Gal Matalon (המכללה לאוטומציה)

TABLE OF CONTENTS

THE PRODUCT

The car price list of the Levy Yitzhak Group is considered a leader in determining the value of used cars in Israel.

Levi Yitzhak׳s car price list app is available for download for both Android and Apple phone users and its download and use are free of charge.

The app allows you to receive data on most of the vehicles sold in Israel, including private cars, commercial vehicles, SUVs, trucks, buses, minibuses, motorcycles, jet skis and electric ATVs and scooters.

Using the app, you can also get the weighted price of the vehicle, after making the required deductions for previous ownership, number of kilometers, number of costs, and more.

WHAT THE STR IS ABOUT

This report is meant to reflect the tests that were conducted on the Levi Yitzhak׳s car price list app, with an emphasis on the bugs that were found, their exact location, severity and type.

Extensive tests were carried out, such as Functional Testing, Installation Testing, GUI Testing, UX Testing, Compatibility Testing, Interrupts Testing, Accessibility Testing, Usability Testing, Interfaces Testing, Performance Testing and Security Testing.

In conclusion, the STR will provide a fare status of bugs vs. tests that passed and a recommendation whether to release the app to the end user or not.

CONCLUSIONS AND RECOMMENDATIONS

Extensive and varied tests have been performed on Levi Yitzhak's car price list app.

In general, most of the tests passed and the majority of the bugs that were found are in minor or major severity. As a result, most of the time the user of the app succeeds in performing the actions that the application was designed to do.

But, the app is by no means ready for release to the end user;

- Quite a few basic functions do not work. As a result, some of the actions cannot be performed at all while the other part requires a detour.
  For example, the app is full of advertisements offering us to purchase a report containing all the information and history of the vehicle. But the function of purchasing the report through the app itself - does not work!
- There is no accessibility button or accessibility options.
- There are many bugs that impair the app's visibility and ease of use.
- The app is full of ads which make it work slower and gives us the feeling of a loaded page instead of a clean and tidy one. In some cases, the adds even hide (partially or completely) buttons in the app.

In conclusion, until most (if not all) of the bugs are fixed, I wouldn't recommend releasing the app to the end user.

BUG LIST

Name	Description
[WS-1]	There is no accessibility button or accessibility options.
[WS-2]	There is no option to rotate the screen.
[WS-3]	There is no option to zoom in and zoom out with the fingers.
[WS-4]	You can′t send an application because it′s not possible to select the subject of the application.
[WS-5]	Spelling mistake – ״מאשאיות״
[WS-6]	The text written on the ״שקלל מחיר״ button is not located at the bounds of the button′s frame.
[WS-7]	The ״חיפושים אחרונים״ button is partially hidden by the banner ad.
[WS-8]	The ״אפשרויות חיפוש נוספות״ button is hidden, it is not visible even when scrolling down the page and cannot be clicked.
[WS-9]	The ״אתר מספר רכב״ button is partially hidden by the banner ad.
[WS-10]	The X button is located on the top data line of the phone, so it cannot be clicked in order to exit the ״הצהרת נגישות״ document.
[WS-11]	The ′Return′ button doesn′t work and you can′t return to the previous page at the ״רכישת דו״ח״ category.
[WS-12]	It takes a lot of time from the moment you click on the ״שקלל מחיר״ button and by the time you get the updated result.
[WS-13]	Requests to allow the app to access the phone′s location keep popping up even after checking ״Don′t allow״.
[WS-14]	The option of ״אפשרויות חיפוש נוספות״ should allow a search without selecting a vehicle type and manufacturer. But it doesn′t.
[WS-15]	The text is too small and it′s inconvenient to read.
[WS-16]	The header with the model′s name is hidden.

[WS-17]	The option of "חיפושים אחרונים" - the app only remembers the type of vehicle and the manufacturer, but does not remember the model type and the sub model.
[WS-18]	Online form "דברו איתנו"-the request is sent even though incorrect and insufficient data has been filled.
[WS-19]	The menu button in the "דו"ח לדוגמא" does not work.
[WS-20]	A button with a man icon intuitively signifies entering 'my area', but clicking on it actually opens a menu of the app.
[WS-21]	The "תוספות אופציונליות" button is partially hidden by the "שקלל מחיר" button and doesn't enable easy clicking on it.
[WS-22]	There are no packages for purchase, so the purchase of the report cannot be completed.
[WS-23]	Clicking on the banner ad (upper or lower) of the app itself - leads to an error page.
[WS-24]	Clicking on some of the ads leads to a gray screen.
[WS-25]	The "שנה" field is not aligned.
[WS-26]	The app is not comfortable to use with one hand.
[WS-27]	The app is full of advertisements, every page has an upper and lower banner and also ads pops up - very disturbing to use, the page looks very loaded.
[WS-28]	The navigation in the app is not convenient; there is no information about our location in the app and there is no option to change the search results, only to return to the previous page.
[WS-29]	After creating a profile, there is no place where you can read and update the profile
[WS-30]	Although when you try to add ownership to a truck, a message "אין הפחתה על בעלויות למשאיות אוטובוסים או מוניות" pops up – but on some cases, the program lets you add an ownership to a truck anyway.
